

LogRhythm Managed Security Service

Maximize your SIEM investment at a fraction of the cost of supporting LogRhythm in-house

LogRhythm is a highly effective security information and event management (SIEM) tool, consistently named as a Leader by Gartner, Inc. However, the power of the LogRhythm platform can also make it overwhelming to learn and a challenge to manage.

You need someone who knows how best to structure and deploy this robust system to ensure you fully leverage the product. With more than 20 years of cybersecurity and compliance experience, Sword & Shield Enterprise Security partners with you through our LogRhythm Managed Security Service to provide 24x7x365 expert monitoring and management of your SIEM solution.

Compare the Costs

The first question most companies ask when comparing MSSP versus in-house SIEM management is, "What will it cost?"

Consider that the average security operations center (SOC) requires at least one manager and five to seven full-time SOC analysts. Using averages, salary, taxes, and benefits costs alone for a minimum SOC of five analysts quickly reaches **more than \$525,000** a year.

Costs for items such as office space, equipment, hosted cloud services, and technology can add up to an **additional \$100,000** a year or more.

Compare these totals to a typical MSSP monthly operational expense of \$5,000 to \$12,000*, and the cost benefit of using outsourced SIEM management services becomes apparent.

Overcome the Obstacles

The biggest hurdle to managing a SIEM internally is creating and staffing the security operations center itself. Providing 24x7x365 coverage requires more staff than you might realize since turnover, scheduling, ramp-up time, emergencies and more must be taken into account.

Outsourcing your LogRhythm management to Sword & Shield's award-winning MSSP overcomes these obstacles of handling this considerable effort in-house:

- Finding the right people and in great enough numbers
- Training staff
- Weathering turnover
- Dealing with scheduling conflicts
- Acquiring physical space
- Keeping systems up to date

* Actual cost dependent on configuration.

About Us

Securing business for more than 20 years, Sword & Shield Enterprise Security, Inc. partners with our customers to meet the needs of their dynamic cybersecurity and compliance landscape.

We work closely with companies to become tightly integrated with their enterprise operations in the areas of managed security, risk and compliance, enterprise security consulting, security incident response and forensics, and security training.

Recognized nationally and headquartered in Knoxville, Tennessee, Sword & Shield has offices throughout the US. Sword & Shield services a broad spectrum of industries, including healthcare, retail, media, banking and finance, legal and manufacturing.

Just Ask

Sword & Shield has vast experience in virtually every area of information security and compliance. If you need a service in these areas not specifically named in a description, the chances are we do it, and we do it well. So, just ask.

Key Capabilities

Sword & Shield provides comprehensive SIEM management services using LogRhythm's key capabilities in the following ways:

- Optimizing the LogRhythm system so that it's working properly and optimally.
- Expertly monitoring your system for threats around the clock.
- Responding to incidents so your IT operations can react.
- Troubleshooting issues and keeping operations running smoothly.
- Applying LogRhythm patches and software updates, keeping your system properly maintained and up-to-date.
- Conducting regular customer meetings to work through ongoing needs.
- Providing appropriate reporting to give insight and vision.

Associated Services

Sword & Shield offers comprehensive Managed Security Services from our 24x7x365 security operations center (SOC). In addition to LogRhythm Managed Services, we provide Phishing as a Service, Vulnerability Management, Advanced Perimeter Defense, Cyber Deception and more.

In addition, Sword & Shield is a full-service security and compliance firm with teams of experts who specialize in areas related to managed security such as HIPAA, PCI, GDPR, and other compliance frameworks as well as penetration testing, virtual chief information officer and security consultant services, enterprise consulting and more.

This range of solutions streamlines your managed security, saves you time and money, and provides consistency of quality.

Why Sword & Shield Enterprise Security

Technology firms that dabble in security tell you what you're doing wrong (or not doing at all) and walk away, leaving you without a plan of action. Sword & Shield partners with you to become an integral part of your cybersecurity and compliance program by not only identifying gaps and vulnerabilities, but also continuing to work with you to achieve and maintain a secure and compliant environment.

In short, Sword & Shield's depth and breadth of expertise in every aspect of our comprehensive portfolio of security services, coupled with our customer-first approach, empowers us to provide tailored solutions and personalized support for small to enterprise level companies. We strive to make your security and compliance initiatives as easy as possible on you.

This is what sets us apart from other information security and compliance firms.

Sword & Shield Enterprise Security is independently AICPA SOC 2 certified by Assure Professional.
